

# Supplier Assurance

At SRS, we work hard to provide the greatest possible customer experience. We take great pride in our creative, high-quality items that come from ethical and responsible sources.

Our suppliers must first adhere to a number of quality, safety, environmental, and social requirements before being accepted. By taking these steps, we can be open with our customers and make sure that every one of our products is functional. When choosing suppliers, we exercise caution and consideration to ensure that all laws are followed.

To guarantee that they are as environmentally friendly as possible and adhere to REACH (Registration, Evaluation, Authorisation & Restrictions of Chemicals), all of our goods are put through rigorous testing.

To support our customers in achieving and exceeding their performance and fitness goals, it is our mission to continue sourcing our products ethically.
